Reasons for Allowance

The following is an examiner's statement of reasons for allowance:

4. The present invention is directed to a wireless communication system / method for increasing the speed of acquisition or reacquisition of a pilot signal by a search engine. Each independent claim identifies the uniquely distinct features "performing a coarse search of an entire PN space using a set of coarse search parameters" and "use the results of the coarse search to select a portions of the PN space for fine search" and "perform the fine search using a set of fine search parameters". The closest prior art, LaRosa et al. US Patent 7,085,246 B1 disclosing an apparatus for acquiring a pseudo-random (PN) sequence timing for a CDMA radiotelephone, either singularly or in combination, fails to anticipate or render the above underlined limitations obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
